

# Why choose a Forest Coffee ?

## A 100% Made in Forest Coffee

Forest Coffees are produced in their ancestral home, in the forests of Ethiopia, far from the sun-drenched fields dedicate to intensive farming

## Organic by nature

The coffee grows at its own pace, with no fertiliser or pesticides

## Sourced directly from the producer

We can trace each coffee back to the plot where it was grown, and we pay producers according to the quality of their coffee

## Outstanding quality

The coffee is infused with the forest's natural wealth, for a particularly aromatic and intricate cup

The cherry  on top of the forest.

**Coffee grown  
using the agroforestry  
model under shade**

**COFFEE GROWN  
CONVENTIONALLY  
WITH NO SHADE**
