

Christmas project

for the schoolchildren of Aratoca public school, in Colombia

Beyond its quality and aromatic profile, we have chosen to propose this coffee because it contributes to the financing of a Christmas project, just a few kilometers from where this coffee was grown:

01

→ A Christmas snack for the children

With the funds raised, a festive event is organized for all the children at the school: a Christmas party with a typical Colombian snack ("arepas").

02

→ Laurina coffee seedlings for the school's coffee plot

With the funds raised, Laurina coffee seedlings, a rare variety that produces coffee with half the caffeine levels, will be donated to the school for a plot of land adjacent to it. On this plot, children learn about agronomy and agroecology and discover all the stages of coffee production, from planting to processing. The coffee produced on this plot helps to support the school year after year.
